

# Light as a Service

A lighting solution that delivers instant energy savings with no upfront investment and can cut costs by up to 60% and energy consumption by up to 80%.

## Qudos

At Qudos we provide the latest LED technology that is energy-efficient and cost-effective. Our engineers will assess your requirements before designing, building and installing a bespoke lighting system that can be monitored and controlled from a central point.

## An affordable solution to upgrading your lighting with no upfront payment

With Philips Light as a Service (LAAS) you can have the latest technology for an affordable monthly payment that covers the entire cost including design, installation, maintenance and servicing. It effectively pays for itself through the money you save.

## State-of-the-art LED technology

Energy-efficient lighting combined with intelligent control systems give a significant reduction in energy consumption and reduce costs by up to 60%

### Benefits

- ✓ No up-front payment, freeing up capital to spend on your business
- ✓ Fixed monthly payments within your budget
- ✓ No risk as we build and maintain the infrastructure
- ✓ Substantial energy and cost savings from day one
- ✓ No maintenance, repair or service worries

## Qudos

At Qudos we provide the latest LED technology that is energy-efficient and cost-effective. Our engineers will assess your requirements before designing, building and installing a bespoke lighting system that can be monitored and controlled from a central point.

# Qudos Group

## Innovation in energy efficiency

For over 10 years we have been at the forefront of SMART technology, providing outstanding service to our customers across the UK and beyond. We are accredited with all relevant governing bodies and our engineers are all highly skilled.

We are a Philips Lighting UK preferred partner which gives you peace-of-mind that you will only receive the highest-quality lighting equipment. You will see improved productivity and performance and save energy and money with our easy to manage dashboard.

### Assess

Our engineer will carry out a survey of your existing system and will discuss your options

### Design

We will work with you to design a bespoke system that fully meets all your requirements

### Install

Once the design is approved, we will carry out the installation, removing and disposing of your old system

### Ongoing service

As part of your contract we will fully manage your lighting system including repairs and maintenance

## Qudos
